

23 - 26 June 2008, Plymouth, UK
Hosted by Plymouth Marine Laboratory

AMEMR 2008

Advances in Marine Ecosystem Modelling Research II 'Bridging the Gaps'

This International symposium is being convened as a forum for presentation and discussion of all aspects of model based marine ecosystem research, encompassing numerical, conceptual, mathematical and statistical approaches, focussing on understanding and predicting the marine ecosystem rather than the technical aspects. This is highly relevant to today's major challenges such as climate change, sustainable management of marine bio-resources and human impacts on the marine system.

The symposium will contribute to the next generation of model based exploration by providing scientists an opportunity to discuss and contrast recent advances, outstanding problems and future requirements.

Timeline

- * Call for abstracts: Sept 2007
- * Abstract deadline: Jan 2008
- * Programme announced: March 2008
- * Registration from late 2007, closing in May 2008
